ATLAS 'ATLANTIC'

SERIES 18—"ATLANTIC"

A simple white reflector cover plate is added to the basic "Atlantic" range spine, to form a batten-type fitting suitable for general use where unshielded fluorescent tubes are acceptable. Atlas Clip-luve plastic louvre attachment (see overleaf) may be used with single tube batten fittings to reduce the source brightness.

18/Q/0125	£12 8 0

1F/Q/2080	£13 17 0

SERIES 1B—"ATLANTIC"

These new commercial fittings employ the basic "Atlantic" chassis together with a decorative opal acrylic diffuser. This has an attractive overall soft diamond texture and interchangeable plastic end plates available in six colours. (8-ft. fittings have plain opal diffusers.) 1B1/2080 is a twin tube fitting with a small diffuser.

KI/2040 DIFFUSER FITTINGS

This attractive 4-ft. 40-watt twin-tube diffuser fitting is specially designed for markets where low initial cost is important. The KI/2040 is complete with twin rod suspension, ceiling cover plate, Atlas "White" tubes, and special 70-watt starter/ballast lamps.

KI/2040	...	£9 17 4*
P. Tax	...	£1 14 8*

*Complete with Bi-pin tubes and starter/ballast lamps.

KEQ SERIES DIFFUSER FITTINGS

Housing two 5ft. 80-watt tubes, the new KEQ/2080 has a pleasing diffuser in extruded reeded Diakon with red clip-in end panels. The diffuser hooks on the chassis which incorporates Quickstart control gear and is suitable for close ceiling mounting or rod or chain suspension.

KEQ/2080/KE25	...	£16 5 4
P. Tax	...	£1 12 1

FU SERIES CEILING FITTINGS

For locations where an unshielded batten is undesirable, the FU fitting incorporates a one-piece internally reeded "Perspex" diffuser of pleasing design. Control gear is housed in the metal chassis. Quickstart version only available for single 5-ft. 80-watt tube.

FUQ/0082	...	£12 14 4
P. Tax	...	£1 11 2

KIQ SERIES STORE FITTINGS

This new fitting is an enclosed diffuser unit which incorporates two 5-ft fluorescent tubes together with two tungsten filament lamps giving an effective and economic blend of fluorescent and filament lighting most acceptable for store and general display use.

KIQ/2080	...	£23 4 6
P. Tax	...	£2 15 8

HDK SERIES SUPER-SLIM POPULAR PACKS

Of entirely new design these super-slim batten fittings are more than worthy successors to the famous Atlas Popular Packs. 8-ft. 125-watt, 5-ft. 80-watt, 4-ft. 40-watt and 2-ft. 20-watt sizes are available, all with new super-slim control gear, exclusive spring-loaded lampholders, and packed complete with Atlas 'White' tubes.

P. Tax	1	10*

*Complete with Bi-pin tubes.
State voltage when ordering.

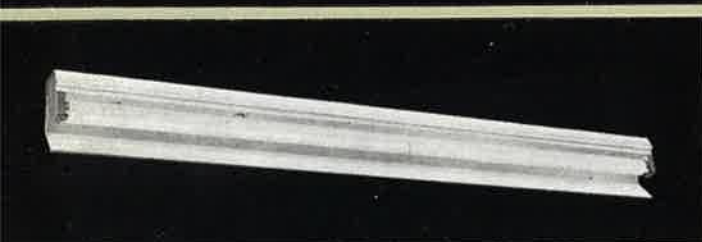

KZ SERIES SUPER-SLIM POPULAR PACKS

OPEN REFLECTOR

Ideal for an extensive range of industrial applications, these super-slim batten fittings have open-ended metal trough reflectors slotted to give upward lighting. 5-ft. 80-watt and 8-ft. 125-watt versions are available, both supplied complete with Glowswitch control gear and Atlas 'White' tubes.

HDK/0125/KZ8	£9 12	6*
HDK/0080/KZ5	£5 15	0*
P. Tax	2	3*

*Complete with Bi-pin tubes.

KX SERIES SUPER-SLIM POPULAR PACK

ANGLE REFLECTOR

Designed to meet a wide demand throughout industry for 'directional' lighting and for chalkboard illumination, this 5-ft. 80-watt angle metal trough reflector enjoys all the improved features of the new super-slim Popular Packs, and is supplied complete with control gear and Atlas 'White' tube.

HDK/0080/KX5	£5 10	0*
P. Tax	2	3*

*Complete with Bi-pin tubes.

KY SERIES SUPER-SLIM POPULAR PACKS

'PERSPEX' REFLECTOR

Again employing the super-slim chassis and control gear, this new 5-ft. 80-watt fitting has a translucent, closed-end trough in opal 'Perspex' for industrial applications where a greater degree of upwards lighting is required, and for situations where corrosion-resistant reflectors are desirable. Control gear and tube supplied.

HDK/0080/KY5	£7 17	0*
P. Tax	2	3*

*Complete with Bi-pin tubes.

KW SERIES SUPER-SLIM POPULAR PACK

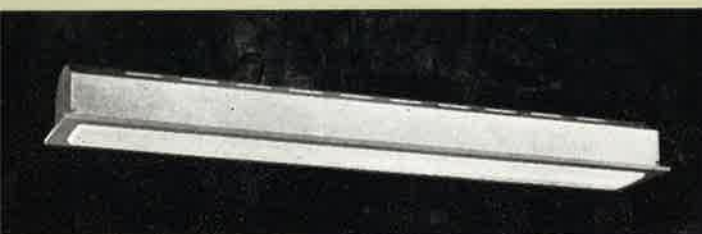

'PERSPEX' DIFFUSER

An extremely attractive diffuser, in extruded Diakon with blue plastic end panels, clips on to the 5-ft. 80-watt super-slim chassis to form a fitting ideal for display and commercial use. Supplied complete with control gear and Atlas 'White' tube.

HDK/0080/KW5	£7 2	0*
P. Tax	13	0*

*Complete with bi-pin tubes.

TROFFER & CLOSE CEILING FITTINGS

GTQ SERIES TROFFER FITTINGS

Dimensions of this new series of recessed troffer fittings are based on a 1-ft. Module, with overall sizes of 6-ft. by 1-ft. and 4-ft. by 1-ft. Fittings based on a 2-ft. Module are also available. Prices shown include an opal dish diffuser, but plastic louvre fittings are also available.

As it is not possible to include all catalogue information in this broadsheet, the following explanatory details should be noted:—

- Except in the case of Atlas Super-slim "Popular" Range, "KA", "KB", "KO", "KI/2040" and "HK" Series fittings, all fittings are supplied excluding fluorescent tubular lamps.
- Subject to a small extra charge, industrial type sheet steel reflector fittings can be supplied with "Miracoat" anti-corrosive enamel finish.
- The reference "S" in "Atlantic" range catalogue numbers indicates the fitting is complete

KCQ SERIES CORNER FITTINGS

The KCQ Series is specially designed for use in corners and against ceiling beams where conventional methods of lighting cannot be used. The fitting is rectangular in shape, incorporating a one-piece moulded opal perspex diffuser. It can be mounted vertically or horizontally according to the light distribution required.

KCQ/2080	...	£19 14 0
P. Tax	...	£2 2 9

HYQ SERIES "DOMINO" FITTINGS

Offering a completely new approach to lighting design "Domino" fittings comprise a metal chassis finished black with a white opal perspex diffuser. Units can be suspended in three ways and can be arranged in virtually limitless variations to give simple yet very striking results.

HYQ/0080	...	£13 10 0

with starter switch control gear, whilst the reference "Q" indicates Quickstart control gear. Other fittings have no reference where inclusive of starter switch gear, but have the letter "Q" added to the catalogue number when inclusive of Quickstart gear. "FW" series fittings are not inclusive of control gear.

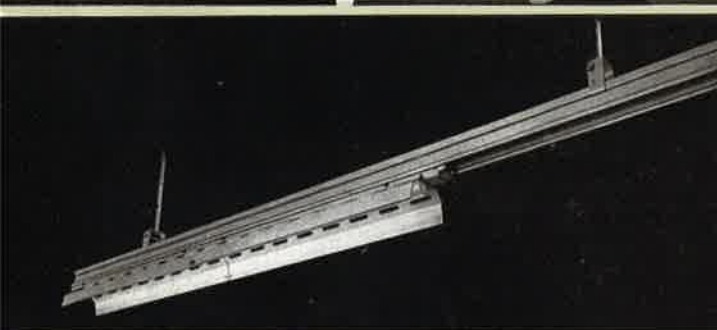

- (d) In all catalogue numbers detailed below, the number and type of tubes are indicated by the four figure reference*: 0125=Single 8-ft. 125-w. 2125=Twin 8-ft. 125-w. 0080=Single 5-ft. 80-w. 2080=Twin 5-ft. 80-w. 3080=Three 5-ft. 80-w. 0040=Single 4-ft. 40-w. 2040=Twin 4-ft. 40-w. 0030=Single 3-ft. 30-w. 2240=Twin 2-ft. 40-w. 2020=Twin 2-ft. 20-w. 0020=Single 2-ft. 20-w.

ATLAS "CLIQUELUX"

Atlas "Cliquelux" is moulded in translucent opal plastic and supplied in sections 11-in. and 11½-in. long for attachment to 1½-in. diameter fluorescent tubes of any length. They are easily fixed to all open type single tube fittings, effectively reducing glare without appreciable loss of light. The sections fit snugly together without a visible break and lock securely on to the tube, to form an attractive yet inexpensive diffuser. Eight "Cliquelux" sections are required for an 8-ft fluorescent fitting, five for a 5-ft., four—4-ft., two—2-ft.

INDUSTRIAL LIGHTING TRUNKING

Atlas Industrial Lighting Trunking integrates specially designed fluorescent lighting equipment with industrial trunking capable of carrying power and lighting distribution cable. All lighting and installation equipment necessary for a factory building is provided and the system has a number of very desirable features.

1. Installation is easy and economical.
2. The use of quick-release reflectors and hinged control gear trays simplifies maintenance

procedure.

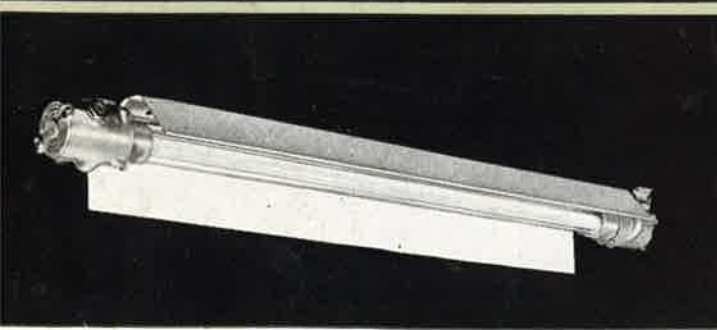

3. Complete flexibility permits rapid repositioning of the lighting fittings to meet any changes in the factory layout. This is possible because all sub-circuit wiring to the fittings is accommodated within the trunking run.
4. It can be suspended at fixing centres of up to 16-ft. 6-in. according to the load on the trunking. It may be possible, therefore, to suspend the trunking from roof trusses without intermediate supports.

HO SERIES VAPOUR-PROOF FITTINGS

The opal "Perspex" cover screen is clamped against a foam sponge gasket, thus forming a vapour-proof fitting with sealed control gear housing. Designed for use in extremely dirty or damp atmospheres, fittings may be hosed down for cleaning. All metal parts are "Super Miracoat" finished.

HO/0080	...	£21	10	8

CONTROL GEAR

BALLAST TRAYS

Atlas Ballast Trays have been completely re-designed and now cover the full range of Atlas control gear sets.

Each tray is finished matt black and contains a complete set of control gear, all components being ready wired to a three-way mains input terminal block. Ballast trays should be used wherever control gear is not required to be housed within the actual fitting but should not be used for outdoor installations.

The CB Series of Control Gear Boxes will no longer be available. Covers for the BT Series of Ballast Trays can now be supplied where enclosed control gear is required

STARTER SWITCHES

All Atlas Starter Switches have solid pins and are colour-coded for ease of identification.

Atlas Glow Switches can now be used on D.C. circuits for 30/40/80-watt tubes in place of thermal starters. All D.C. Switches are coloured pink.

The 80-watt Universal A.C. Glow Switch is available with either two or four pins. Universal Glow Switches are coloured gold.

Series pairs of short lamps require the Double Glow Switches (British Patent 638790). These Switches are identified by their blue canisters. Large canisters are 1½ in. dia. x 2 in. high. Small canisters are ¾ in. dia. x 1½ in. high.

Manually re-set cut-out switches are in green canisters.

CAPACITORS

Atlas Capacitors are enclosed in hermetically sealed, leak-proof aluminium cans. The dielectric is impregnated with a chlorinated diphenyl (arochlor) and these capacitors may be used safely in any conditions so long as the surface temperature of the containers does not exceed 70° C.

All capacitors are provided with discharge resistances, and fixing clips are available on request.

ENT LIGHTING EQUIPMENT

CHOKES

Atlas Chokes are now 'Permaset' filled and designed to operate in all atmospheric conditions. Unless otherwise indicated, Atlas Chokes are supplied for 50-cycle A.C. voltages tapped for 200/210, 220/230, 240/250 volts.

BL/2800 is designed for use with two 2 ft. 40-watt tubes in series.

BL/2747/H and BL/2748/H are non-tapped Chokes suitable for 230/250-volt supplies.

QUICKSTART

The Atlas Quickstart unit dispenses with the need for replacement starter switches and thus minimises maintenance cost. In addition, the special pre-heating transformer gives the quickest possible starting compatible with long life. In its simplest form it comprises a high impedance auto-transformer with secondary windings at

each end of the primary. The primary is connected across the mains in series with the choke and the secondaries are connected across the tube cathodes.

QUICKSTART BALLASTS

These units comprise a step-up voltage ballast and Quickstart unit in a single container (separate P.F.C. capacitor needed).

BALLASTS

A range of high-power factor combined ballasts enclosed within compound filled containers. These units must always be mounted in cool positions with adequate ventilation. This is particularly important in multi-lamp installations or where excessive ambient temperatures exist.

BC/2536 is a weatherproof ballast suitable for protected outdoor use.

ATLAS "G.P. QUICKSTART" TUBES

ATLAS "G.P. QUICKSTART" tubes are suitable for operation on all types of circuit and on all supply voltages. They are available in six standard "Whites" plus "De Luxe Natural".

WHITE, recommended for all general lighting purposes because of its colour and high efficiency.

DAYLIGHT, for general use in factories, etc.

NATURAL, a high fidelity colour rendering variant of the Daylight tube, for store lighting, etc.

WARM WHITE, for libraries, hospitals and offices.

DE LUXE WARM WHITE, for home, restaurant and the more intimate surroundings, and for blending with tungsten filament lighting.

NORTHLIGHT (6,500° K), which simulates north sky daylight, ideal for colour matching.
