Standard Pack 12 or 25

Lamps up to and including 200w. are subject to Purchase Tax

# OMEGA LAMPS

## *Second to None*

Often we are asked how it is that the quality of Omega lamps is so consistent and, when we point out that our organisation has been making lamps for over 50 years, the questioner begins to realise what a wealth of experience and technical "know-how" we have accumulated.

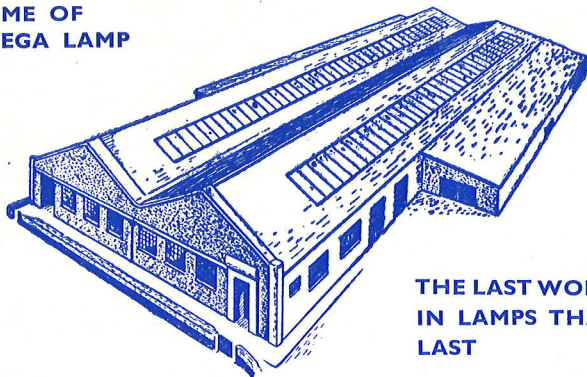

Apart from the high standard of quality—each lamp is made to B.S.I. Specifications and twice tested before leaving the factory—our aim is to give customers service and a price which is economical. Because of this we enjoy a reputation "second to none" in the lamp world.

Our technicians are available to help and advise on any lighting problem and we are able to quote very competitive prices for special lamps made to customers' own specifications.

We have a comprehensive range of fluorescent fittings for both industrial and decorative purposes. Please ask for separate booklet giving all details.
