PHILIPS FACTORY MARKS

1. System

The factory mark indicates the factory where the product has been made or the firm from whom the product has been purchased.

A clearly visible factory mark has to be applied to all products delivered by the Lighting Division, made under the brand Philips and to the outer packing (contents label) of these products. For the general requirements, cf. ULM-D 1175. For ballasts, cf. LAV 400-001-010G.

The factory mark is a symbol which looks as follows for the various factories and firms:
