

Glass and Ceramics

Advanced processing and shaping

PHILIPS

Profile

Philips has a long time track record of processing and shaping glass and ceramic material. Our advanced manufacturing facilities are equipped for creating all kinds of shapes (pills, plates, rings etc.) in different sizes, from 1 mm up to 20 mm.

Competences and technologies:

- Milling
- Sieving
- Granulating
- Pressing
- Sintering
- Paste preparation
- Suspension making
- Chemical and physical analysis

Functionalities:

- Fixation of electric wires
- Gas-tight sealing
- Conduction
- Reflection
- Isolation
- Adhesion
- Marking

In close co-operation with our customers we have developed several dedicated solutions that are being used in among others automotive and high-pressure lamps, (LCD) television sets and LED applications.

We keep it
no matter how
the technology

simple for you, now advanced ogy

Designed around you

All products and applications are developed in co-operation with our customers.

Easy to experience

We offer in house analysis and a short time to prototyping.

Advanced

We work with high tech equipment and well-trained and motivated people. Our stringent quality control program guarantees the best quality for raw materials, processes and products. We are ISO 9001 and 14001 certified.
